Composing Your Painting

The paintings I create are unique in that they are not mere copies of photos, although I can do that--that is easier. I like to design an original painting using many of your photos to satisfy the best memory you have of your pet and or child--the way you wish the photos could. Many times people give me photos with missing features or parts of their pet or child, but they like a certain expression in one, the position in another, etc. That's OK. I can make the painting the way you want it, and add a background too, especially in nature, to complete the picture. Your portrait will usually take about 4 weeks to complete. I look forward to working with you.

Information About Your Subject

Please Be as Specific as Possible

Age, Height, and Weight: _____

Distinguishing Features and Description (Personality, Markings, etc.):
